Career Objective

Motivated and enthusiastic Computer Science Engineering student specializing in Artificial Intelligence with strong interest in software development, problem solving, and full stack web development. Passionate about building real-world applications and continuously improving technical skills in Python, Java, and MERN stack technologies.

Education

Bachelor of Technology (B.Tech) – Computer Science Engineering (AI),

Present

Parul University

- Currently Pursuing – 3rd Year

Technical Skills

- | | |
|--------------|----------------|
| • Python | • Java |
| • HTML | • CSS |
| • MERN Stack | • Git & GitHub |

Projects

TravelLoop – Trip Planner Application, *GitHub Repository: <https://github.com/JayanthH2124/Travel-Loop>*

- Developed a travel planning web application focused on simplifying trip organization and destination management.
- Worked on user-friendly UI design and responsive layouts for better user experience.
- Utilized modern web technologies for frontend and backend integration.
- Collaborated on project structure, feature implementation, and application flow.
- Technologies Used: HTML, CSS, JavaScript, MERN Stack

SARA Application

- Developed a personal application project focused on improving practical development skills.
- Worked on frontend structure, application logic, and feature integration.
- Enhanced understanding of full stack development concepts and real-world project workflow.
- Technologies Used: Python, HTML, CSS

Strengths

- Passionate about full stack development, coding challenges, and building real-world applications
- Strong problem-solving mindset with interest in learning new technologies and improving development skills.
